Reference Notes

Wrap-up	
1 Base Implementation will cover implementation of a customer with up to 2 campaigns 1 Base Implementation includes business user configuration walk through and developer configuration walk through 1 Base Implementation includes a roadmap design session to align on short, medium, and long term priorities 1 Additional Hours per Additional Campaign (on top of the 2 campaigns included in Base)	2 campaigns
Platform setup includes site mapping and standardized identity type configuration. Number of Domains: Sub-domains are included. Example: test.com and sample.com are 2 domains. Number of Languages: 1 Language is included in the quickstart. Additional Languages will be add additional effort per language. Not Included: customizing Identity Gear (no fuzzy matching), multiple locale/currency support, customization of SF integrations Complex Site Types: Flutter, React, Mobile React, Hydration on React, SPA (Single Page App), Headless Commerce Cloud	1 website domain 1 language
Examples of feeds: Salesforce Marketing Cloud engagement data via SFTP, customer data from an external system, catalog feed, offline transactions, call center activity etc. All feeds will be required to match IS (Personalization) feed specifications https://doc.IS(Personalization).com/display/EKB/CSV+Feed+Requirements If the client has a required Data Source/Feed that cannot be delivered to IS (Personalization) specification custom scoping is required. Base Implementation assumes 1 Product Catalog Feed and 1 User Feed (CRM, ESP, DWH, etc)	customer data

Only includes Campaigns using Global Templates. Examples of supported campaigns can be found here .	3 additional wet
Only includes Campaigns available in IS (Personalization) Playbooks. Campaign is typically counted per email content zone. OTE cammpaign information can be found here . Please validate if the customer has a Technical Email Developer available to match formats between the styling between the IS OTE and the email code.	1 OTE campaig
SDK Implementation Support. Does not include setting up IS (Personalization) SDK within customer's mobile app or building mobile app personalization Campaigns (see next section).	
Mobile App campaign setup. For development of campaigns inside MCP only, this does not include Mobile Tracking or any mobile development.	
on	
Configure the Sales/Service Cloud Gear to enable the NBA component in Sales/Service Cloud. Requires access to Customers' Sales/Service Cloud Instance. Customer will be responsible for setting up within Sales Cloud and Service Cloud	
Confluence on how the feature works: https://confluence.internal.salesforce.com/pages/releaseview .	
Includes setting up of Campaign within IS (Personalization) and providing API to the customer. Customer is responsible for implementing the API within the External System and sending feedback data back to IS (Personalization). Example	
er	
Please review the Journey Builder documentation for latest information on Journey Builder functionality. JB Integration will likely require a User ETL from the Marketing Cloud to bring in Contact Key and Email Address for Identity Matching within IS This DOES NOT include building the Journey and/or Emails in Marketing Cloud.	
s Coming Soon)	
Configure the Marketing Cloud Gear such that triggers from IS (Personalization) to send an email via Marketing Cloud. Does not include building of the triggered email	

***** Please ask your SE for [this document](#) or fill it out if the SE has not. The document is a reference guide to fill in all of the questions in the scoping calculator*****

Guidelines on Using this Scoping Calculator:

For help with thorough scoping please fill out [this document](#)

Base Implementation Package

1. 16 Hour Discovery Workshop
2. IS (Personalization) Platform Setup (Data Model, Identities, Sitemap)
3. 2 Data Feeds
4. Customer Handoff for both Business and Technical Users

Base Implementation CUSTOMER PROFILE

1. Customer who understands the Interaction Studio platform
2. Customers with basic data needs - the customer has a centralized location for all of their user and product information
3. Customers implementing IS (Personalization) only one domain with one locale
4. Customers who can use existing templates for website and open-time email personalization Campaigns
5. Customers who have a clear vision for an Interaction Studio proof of concept
