## Data 360 (Data Cloud)

### Sources

- Google Big Query (Zero Copy or Acceleration)
  - Tables (Customer Data Mesh):
    - bi\_customer\_account
    - bi\_customer\_storefront
    - bi\_visit
    - bi\_email\_daily\_summary
    - Question: Should we be including any other tables in the sync between Data360 and Google Big Query
    - Updated schema provided
- 3rd party Data Provider
  - We are recommending that Beyond use a 3rd party data provider to enrich your customer records with info described below. (see table below):
  - Question: Are there any other attributes missing?
  - This is complete from entities outside of the data mesh schema via Acxiom, but is being considered for expansion to all brands

| #  | DataAttributes                                                                                                                      |
|----|-------------------------------------------------------------------------------------------------------------------------------------|
| 1  | <i>person.coreDemographics.gender</i>                                                                                               |

## Activation Target

- Marketing Cloud Personalization
  - Question: What is the timing and types of audiences you would like to propose from Data360?
    - Near-real time event based communications (per user event)
    - Scheduled segment audiences
    - Product purchase/browse signals from entity A to activate to entity B
    - Value segmentation
    - Lifecycle (based on account create, last purchase, etc)
- Paid Marketing
  - Question: How many target segments are required for paid marketing channels?
  - Per platform we'll have:
    - Purchasers for Lookalike (Value, Recency, etc)
    - Purchasers non-marketing email subscribers
    - Category, typical purchasers
    - Seasonal holiday purchasers (for lookalike)
    - New Movers
    - College (aged or parent of)
    - Expectant families
  - Question: Besides Google Adwords and Facebook, are there any other paid media channels? (add the following media channels TikTok, Pinterest)
    - Criteo, Pinterest, TikTok

## Marketing Cloud Personalization (MCP)

## Web domains and subdomains

- Question: Which domains and subdomains require promotional web campaigns?
  - BBY US (MCP is installed here)
    - Subdomain: BuyBuyBaby
  - Overstock (MCP is installed here)
  - ~~Kirkland Homes (requires new MCP implementation)~~
  - ~~Container Store (requires new MCP implementation)~~
  - ~~+1 brand website~~
- Question: The following table includes initial ideas for suggested promotional web and open time email campaigns. Are there any other campaigns that are required?

|   |                                                                                                                                                                                                             | BBY US | Overstock | BuybuyBaby | Kirkland Homes |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|-----------|------------|----------------|
| 1 | Set up website beacons and catalog feed                                                                                                                                                                     | n/a    | n/a       | Yes        | Yes            |
| 2 | Update MCP person account records (known users) with unified ID and/or 3rd party enriched customer data attributes (example Income level) from Data 360                                                     | Yes    | Yes       | Yes        | Yes            |
| 3 | Web campaign #1: Serve up a mortgage ad targeting self identified users who are interested in a mortgage                                                                                                    | Yes    | Yes       | Yes        | Yes            |
| 4 | Web campaign #2: Ingest household income into Salesforce recommendations to serve higher price items to customers with higher incomes.<br>Also include Acxiom personas, etc to inform Einstein product recs | Yes    | Yes       | Yes        | Yes            |
| 5 | Web campaign #3. Target households who have recently moved with dedicated creative-> key expansion and persona opportunity                                                                                  | Yes    | Yes       | Yes        | Yes            |
| 6 | Web campaign #4 Summer targeting/expansion opportunity as parents get kids ready to head to college                                                                                                         | Yes    | Yes       | Yes        | Yes            |
| 7 | Web campaign #5: Target patio category with 'small space' approach (bistro sets) for apartment and condos vs bigger patio furn (patio sofas) for single family homes.                                       | Yes    | Yes       | Yes        | Yes            |
| 8 | Email campaign #1: Serve up a open time email content box for Braze to use in sending mortgage follow email content                                                                                         | Yes    | Yes       | Yes        | Yes            |
